

Continental and marine temperature trajectories, 59–54 Ma

Shared age direction; independently estimated curves are not tuned

A CFB pedogenic-carbonate temperature

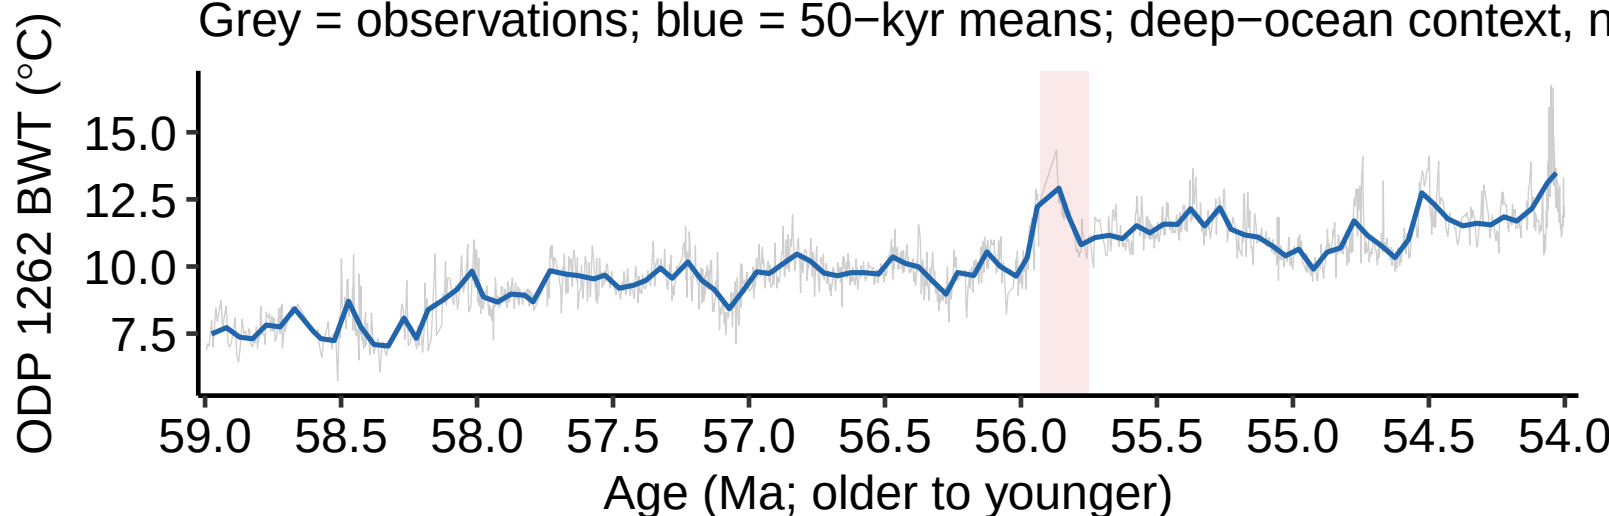

Only observations retained by the temperature-model screen; red

○ U-M micrite □ Published micrite

B South Atlantic deep-ocean temperature

Grey = observations; blue = 50-kyr means; deep-ocean context, n

CFB band is uncertainty in the fitted conditional mean, not total proxy, age-
