

Clarks Fork Basin stratigraphy and published climate records

Late Paleocene–early Eocene; shared CFB composite meter scale

Published proxy data only; U–M observations excluded. Wing and Fricke–Wing aggregate ages are projected to CFB height using the GTS2020 age model (no extrapolation); Fricke–Wing MAAT is phosphate–derived. MAAT/CMMT/WMMT context: literature marginal Monte Carlo intervals (50/80/95%); not fitted posteriors.
