

Early Paleogene temperature records from ocean to land

A

Pacific marine SST

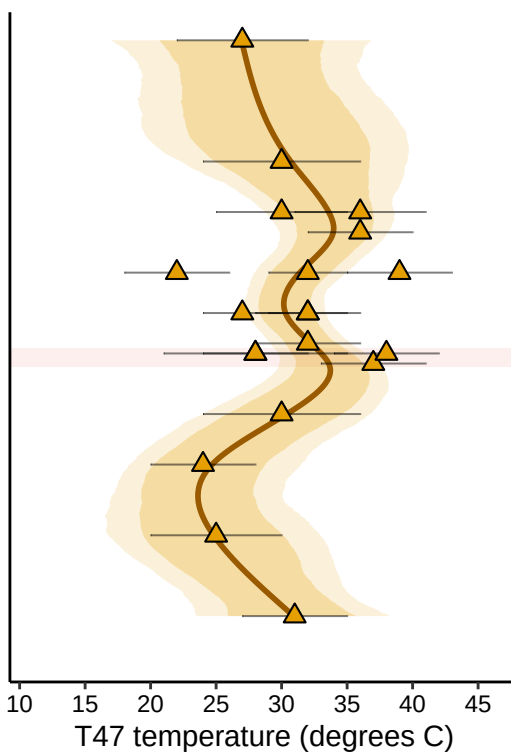

Harper et al.; mean and 95% interval

B

Tornillo Basin

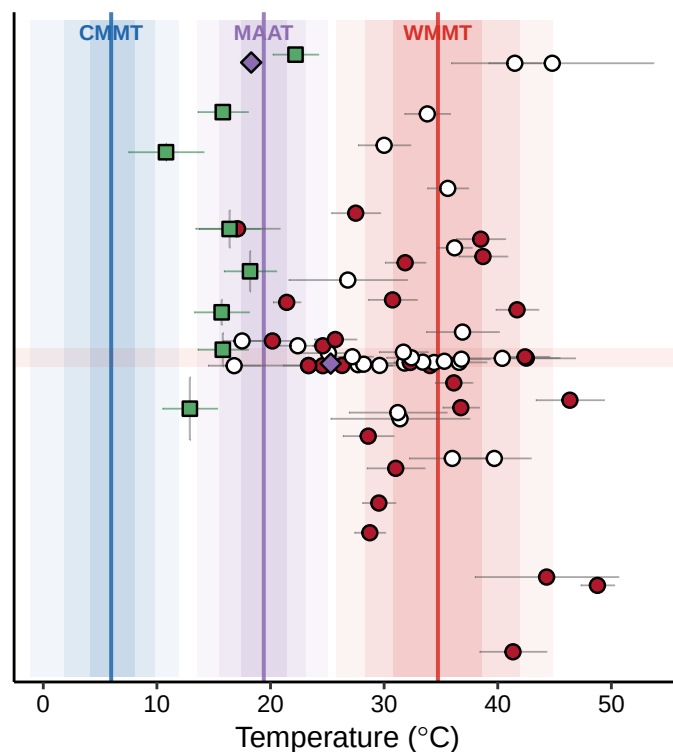

Screened micrite D47 model; 80% and 95% intervals

C

Bighorn Basin synthesis

Screened D47, other proxies, and seasonal ranges

● This study D47 ○ Published D47 ■ Wing LMA MAT ◆ Fricke-Wing MAAT

Pink band: PETM. Tornillo model uses only screened primary micrite; dark/light orange ribbons are 80%/95% Monte Carlo intervals. BHB clumped points pass the current $\delta^{18}\text{O}_{\text{carb}}$ and T47 screen. BHB blue/purple/red bands are literature-informed CMMT/MAAT/WMMT 50%, 80%, and 95% ranges. These archives record different seasons and environmental reservoirs.
