

Marine and continental temperature records, 59–52.5 Ma

Marine curves: Barnett et al. (2019) Atlantic Site 1262 and its Pacific Site 1209 comparison. Top marine axis uses the Barnett published Site 1262 BWT-d18O relation ($T = 10.37 - 4.44 \times d18O$). Terrestrial T47 age bars show an assumed ± 0.2 Myr plotting uncertainty; formal age uncertainty is not propagated. Pink band marks the PETM.
