

CFB carbonate $\delta^{18}\text{O}$ versus T_{47}

Grey curves show constant calculated parent–water d18O (per mil VSMOW)

Carbonate material $\square$ Altered carbonate $\circ$ Pedogenic micrite $\triangle$ Spar

Alteration likelihood $\bullet$ Not assessed

Δ_{47} –d18O framework: Henkes et al. (2018). Calcite–water fractionation: Kim and O'Neil (1997).
