

CFB alteration probability in T_{47} - $\delta^{18}\text{O}$ space

Point fill is based only on $\delta^{18}\text{O}_{\text{carb}}$: 5% at the pooled BHB mean (22.24 per mil)

Modeled probability
of alteration

0% 25% 50% 75% 100%

Carbonate material $\square$ Altered carbonate $\circ$ Pedogenic micrite $\triangle$ Spar
