

Bighorn Basin burial–temperature context for carbonate alteration

Sensitivity reconstruction from Roberts et al. (2008) tables 2 and 3; not a sample-specific kinetic or fluid-flow model

A Roberts et al. (2008) burial–temperature scenarios

Eight calibrated basin models; points mark the modeled base of the Fort Union

—●— McCulloch Peak model —●— Other Roberts et al. locations

B Thermal projection through the CFB composite

Orange = McCulloch Peak; dashed = median; bands = scenario ranges

Formation Fort Union Willwood
