

BHB T_{47} - $\delta^{18}\text{O}_{\text{carbonate}}$ alteration-trajectory index

5% at pooled BHB micrite mean (22.25 per mil); 95% at 20 per mil; lower values extrapolate to 100%

The index uses d18Ocarb only. Qualitative petrographic classes, D47-D48 residuals, and temperature plausibility are not included.
