

Mean Monte Carlo burial path and $\delta^{18}\text{O}$ simulation envelopes

Line is the ensemble mean; nested bands contain the central 50%, 80%, and 95% of simulated paths at each temperature

Central simulation interval

50%

80%

95%

Carbonate material

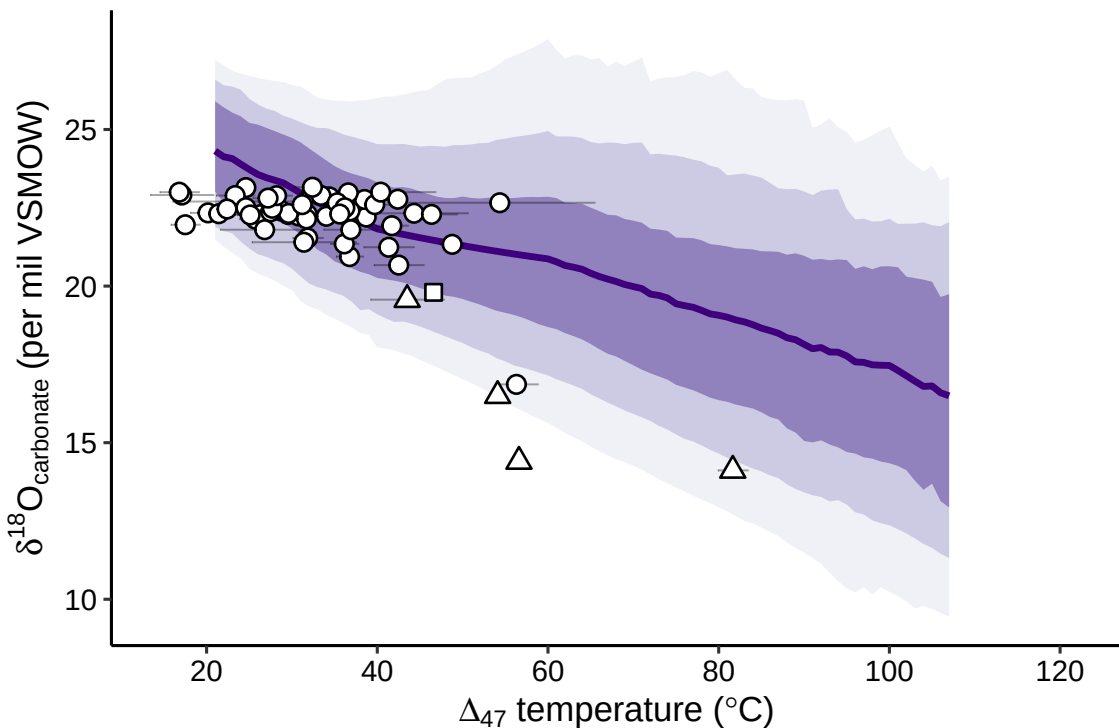

Altered carbonate

Pedogenic micrite

Spar

Intervals summarize the specified uniform parameter ranges and are not fitted confidence intervals; at least 1
